3.81(c)(2)

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

Item Environment Enhancement 3.81 c 3

At the time of inspection primate R11001 showed areas of hair loss along the back. In reviewing the animals record this was first seen back in Feb 2015 .The next entry in the animals record was in June of 2015 indicating patchy alopecia. There were no further entries in the animals record since then. The enrichment program of non human primates indicates that atypical behavior will be evaluated regularly and written in the animals record. The facility needs to follow their plan and insure atypical behavior is documented and treated.

Correct from this day 1/5/2016

Exit interview took place at the end of inspection
