DAVID ERICKSON

Type: ROUTINE INSPECTION
Date: 21-SEP-2016

2.75(b)(1)

RECORDS: DEALERS AND EXHIBITORS.

The inventory and acquisition records were either incomplete or completely missing for all the animals but 12 goats. Lack of accurate and up-to-date inventory and acquisition records does not ensure for the proper tracking of the animals by APHIS Officials as necessary. Update the facility inventory and acquisition records with all required information so they accurately reflect the current inventory of animals. Correct by 10/5/16.

3.53(a)(1)

PRIMARY ENCLOSURES.

An enclosure containing two rabbits had chicken wire on one wall where the top half of it was hanging down with multiple sharp points sticking out into the enclosure. Sharp points in an enclosure could potentially cause injury to the animals within that enclosure. The enclosure shall be maintained in good repair to protect the animals from injury. Correct by 9/28/16.

3.125(a)

FACILITIES, GENERAL.

An enclosure containing one of the llamas had part of the fence line that was in disrepair from a tree branch that had fallen on it a few years ago. This part of the fence line was not stable and was mangled to the point where the llama could potentially get its head stuck in it.

Two enclosures containing a total of 9 goats, 5 sheep, and 1 deer had wooden bridges for the goats to walk across. Both bridges had screw heads sticking out of it. Screw heads sticking out could potentially be stepped on by any animals walking across the bridge causing a potential injury to an animal's feet.

All housing facilities must be maintained in good repair to protect the animals from injury.
