Type: ROUTINE INSPECTION
Date: 23-JUL-2025

2.33(a)(2)

Attending veterinarian and adequate veterinary care.

During document review, an incident was noted in the IACUC meeting minutes dated June 27, 2024 in which a veterinary directive was given to separate one colony housed marmoset from its cage mates. The directive stated that the animal was to be placed in a transport box located outside of its home cage to ensure both physical and visual separation. When the animal was checked by the veterinarians the next morning, they observed the animal still had visual contact with its cage-mates and was exhibiting signs of distress which were alleviated as soon as a visual barrier was placed. Retraining and additional veterinary oversight have been provided for this Investigator and these animals. Veterinary instructions need to be followed as directed to ensure animal well-being and to avoid inadvertent and unnecessary discomfort, physical harm, trauma and behavioral stress. Each facility shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

Corrected prior to inspection

This inspection and exit interview were conducted with facility representatives.
