Bob Dunns Animal Services Inc  
16001 Yarnell St.  
Sylmar, CA 91342

Customer ID: **3598**

Certificate: **93-C-0232**

Site: TRA

BOB DUNNS ANIMAL SERVICES,  
INC.

Type: ROUTINE INSPECTION

Date: 04-SEP-2024

### 2.126(c)

#### Access and inspection of records and property; submission of itineraries.

The licensee did not submit a written itinerary for events involving overnight stays at least two days prior to travel. The facility emailed the Animal Care Field Office a copy of their itinerary on September 2nd, 2024. However, the itinerary outlined travel taking place the day before on September 1st, 2024. Additionally, the itinerary did not include all locations where the animals would be exhibited or temporarily housed during the travel dates of September 2nd – September 7th. Itineraries enable effective tracking of animal movement, biosecurity monitoring, and permit inspections to be conducted in accordance with the AWA when animals are away from the home site.

Traveling exhibitors who intend to exhibit any animal at any location other than the facility's approved site (including, but not limited to, circuses, traveling educational exhibits, animal acts, and petting zoos), except for travel that does not extend overnight, shall submit a written itinerary to the AC Deputy Administrator no fewer than 2 days in advance of travel containing all complete and accurate information as outlined in this subpart.  
Correct by September 11, 2024.

### 3.87(f)

#### Primary enclosures used to transport nonhuman primates.

At the time of inspection, neither primary enclosure housing the two capuchins had the words "Live Animals" or "Wild Animals" on the top or sides in letters at least one inch in height, as required. Additionally, there were no arrows to denote the upright position of the crate during transport.  
Failure to properly label crates used to transfer live animals could result in injury to the animals, along with mishandling during transportation.

Unless the enclosure is permanently affixed to the conveyance, it should be clearly marked on top and on one or more sides with the words "Live Animals" or "Wild Animals" in letters at least 1 inch (2.5 cm.) high, and with arrows or other markings to indicate the correct upright position of the primary enclosure, in order to help ensure proper handling while in transport.  
Correct by September 11, 2024.
