Certificate: **23-C-0292**
Site: 001
ERIE ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION
Date: 01-FEB-2018

3.125(a)

FACILITIES, GENERAL.

The ferret enclosure showed signs of excessive rust especially in the lower right hand corner. The rust appeared pitted and paint was flaking off. The bars of the enclosure were mobile and integrity of the enclosure was compromised. The primary enclosures of the facility must be kept in good repair to prevent injury to the animals and ensure containment. The facility must take appropriate measures to repair the enclosure.

Correct by February 8th 2018.

3.131(d)

SANITATION.

There is a pest control issue in the lion, rhinoceros and wallaby enclosures. Excessive amounts of mouse droppings were noted in the corners of the lion back holding area. Mice can carry a variety of diseases and parasites that can effect the health of the lions. The rhinoceros and wallaby enclosures had a large number of avian pests and avian excreta. Avian pests, including house sparrows and pigeons, can carry a variety of diseases and parasites; measures must be taken to minimize their entry into the enclosures. The facility must create a safe and effective pest control program to ensure optimal animal health.

Correct by February 15th, 2018.

This inspection and exit interview were conducted with the facility representative.

Additional Inspectors

D Ambrosio Andrea, Animal Care Inspector

Prepared By: CROWLEY LACY, D V M USDA, APHIS, Animal Care
