Customer ID: 749
Certificate: 14-R-0156
Site: 001
CAPRALOGICS INC

Type: ROUTINE INSPECTION
Date: 26-JUL-2016

2.38(f)(1)

MISCELLANEOUS.

Handling.

1. A rabbit was found dead in its cage by facility personnel in December 2015. No abnormal behavior in the animal had been noted in the days prior to death. The research facility conducted an investigation and determined that there had been a failure of the watering equipment due to employee error and as a result, the animal had gone without water for several days that resulted in its death.

Per this Section of the Regulations, handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort.

The research facility acted promptly to address this item by conducting an investigation and implementing appropriate corrective actions including re-training husbandry staff to prevent any future incidents. No additional incidents have occurred.

This item has been appropriately addressed by the research facility and it has been corrected.

NOTE - Inspection conducted 7/26/16 and 7/28/16. Exit interview held 7/28/16 on-site with facility representative.
