### 3.125(a)

#### FACILITIES, GENERAL.

Several pieces of ceiling insulation are separating from the underside of the metal roof above the stalls of three giraffe housed in one building. In the adjacent hoof stock building, several pieces of ceiling insulation are separating from the underside of the metal roof above the stalls of six zebra, two kudu, and six gazelle. Insulation material which has separated from the ceiling may fall into an animal enclosure and could potentially be ingested by the animals housed in these two buildings. The ceiling insulation must be properly secured or replaced to prevent it from falling into an animal enclosure and to avoid accidental ingestion. To be corrected by: January 30, 2015.

This is an electronic copy of the inspection report provided to a facility representative on November 25, 2014.

The inspection and exit briefing was conducted on November 24 & 25, 2014 with zoo staff.
