Records: Operators of auction sales and brokers.

The licensee has not made, kept and maintained any records which fully disclose the required information concerning animals consigned for sale via Facebook. The only record available was the actual Facebook post. A review of Facebook posts from June 30, 2024 to October 9, 2024 shows multiple posts featuring photos of an animal along with a description to include species and sex of the animal and a statement indicating that if the viewer is interested in purchasing the animal they should reply. Posts viewed included the following: female kangaroo, multiple (sex not stated) marmosets, male and female otters (small clawed), female spider monkey, and male capuchins. The licensee stated that she did not take possession of the animals but acted as a broker posting the animals for sale for others and connecting the buyers with the sellers. Keeping complete and accurate records is required of brokers whether or not a fee or commission is charged in order to ensure legal and medical tracing of the source and sale of regulated animal species. The licensee shall make, keep, and maintain records which fully and correctly disclose all the required information concerning each animal consigned for sale including the name/address of the owner, the name/address of the buyer, the USDA license number of both persons if licensed or the vehicle license number/state and driver's license number/state if not licensed, the date, and a full description of the animal including species/breed, sex, date of birth/approximate age and color/distinctive markings. Correct by 11/1/24.

This inspection and exit interview were conducted with the licensee.
