April and Ryan Cicchelli

Type: ROUTINE INSPECTION  
Date: 16-MAR-2023

---

### 3.127(d)

#### Facilities, outdoor.

There is a large gate on the back, or North side of the facility. This gate is used for tractors or vehicles to go in and out to dump excess waste and bedding. There is an approximately 10" gap along the side of the gate where it meets the perimeter fence. There is a piece of what appears to be plastic coated shelving at the bottom of the gap. This piece is approximately 3' tall. There is an approximately 6' gap above the wire piece that has nothing obstructing entrance to the facility.

All outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility.

Ensure that the perimeter fence, and gates that make up areas of the perimeter fence, are constructed and maintained so that animals and unauthorized persons cannot enter the facility.

To be corrected by March 24, 2023

This inspection and exit interview were conducted with the licensee.
