3.6(c)(1)(3)

PRIMARY ENCLOSURES.

Additional space requirements for dogs.

***An adult female Miniature Pinscher was housed in the large kennel building within a stack type cage enclosure. This enclosure was measured at 19 inches high. This height provided 3 to 4 inches of free head space for the dog, not the required 6 inches. All enclosures must be constructed to provide at least 6 inches of free head space above the dog's head while in a normal standing position. Corrected during the inspection.

This inspection and exit interview was conducted with the owner. The report is to be sent via email.
