### 3.53(a)(4)

#### PRIMARY ENCLOSURES.

Rabbit hutch floors are made of a thin wire mesh. Thin wire mesh without solid surfaces can result in discomfort or eventual injury to rabbit hocks and legs. Some solid surfaces are available, and were occupied by rabbits at time of inspection. The amount of solid surfaces was not sufficient for all animals in the enclosure. A system of enclosure design and maintenance must be in place to prevent possible injury to the animals.
