NEW MEXICO WILDLIFE CENTER

Type: ROUTINE INSPECTION

Date: 31-JAN-2018

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

According to a facility representative, in September 2017 a new attending veterinarian (AV) had been obtained for this facility. The new AV has not performed a site visit and has not completed a new written program of veterinary care (PVC). The written PVC should contain enough detail to reflect what is actually being conducted on the premises. Routine preventative medications and other routine approved treatments that the veterinarian has authorized must be included in sufficient detail to ensure that adequate veterinary care is being provided and that it is at the direction of the new attending veterinarian. The lack of details on preventatives and/or treatments could lead to inadequate veterinary care.

The attending veterinarian needs to be employed under formal arrangements with a written program of veterinary care and needs to conduct regularly scheduled visits to the premises.

To be corrected by: February 28, 2018

This inspection and exit briefing were conducted with the Lead Animal Caretaker.
