Type: ROUTINE INSPECTION
Date: 28-OCT-2019

3.127(d)

FACILITIES, OUTDOOR.

On today's inspection there are 3 raccoon and 1 fox in enclosures that are outside of the primary fence. In addition, there were 4 cavy's identified on today's inspection that did not have an enclosure and a perimeter fence. The perimeter fence was part of their primary enclosure. These animals do not currently have a secondary means of containment in the event that they are able to escape from their primary enclosure. In addition, there is nothing to prevent other animals or people from being able to make contact with these animals. All outdoor housing facilities must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

Correct By 11/11/2019

This inspection and exit interview were conducted with the Licensee.
