Certificate:

Site: 001

Blaine Brown

Type: RE-LICENSE INSPECTION

Date: 24-SEP-2024

3.131(c)

Sanitation.

The back storage area, in close proximity to hay and bedding storage, contains metal, wood and plastic material piled up haphazardly so that there is no way to visualize underneath. This may affect animal welfare due to the pile of debris making it an optimal condition for attracting vermin that could be a health risk to the animals. The piled material should be placed in designated areas so that the storage area can be visualized and cleaned as necessary to protect the health of the animals. Correct before next re-license inspection.

3.153(a)(1)

Primary enclosures.

There are three areas with sharp-edged pieces of welded metal within an 8-inch by 36-inch open gap between the top and second rail of sectioned fencing where the emu has head and neck access. The effect to animal welfare is due to a risk of injury to the emu's head and neck if she puts her head through the gap in the fencing next to the sharp metal. The enclosure must be free of sharp edges which could be injurious to birds. Correct before next re-license inspection.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by November 23, 2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires on September 30, 2024.
