Type: ROUTINE INSPECTION
Date: 19-NOV-2014

3.127(b)

FACILITIES, OUTDOOR.

Several enclosures housing animals including, but not limited to, the wolves, lynx, bobcats, raccoons, porcupines, and foxes all have shelters structures in their enclosures. However, the shelters are enclosed on only three sides and the fronts of the shelters are open. The open fronts have no weather breaks and cannot prevent the wind and/or snow from blowing into and potentially accumulating within the shelters. Also, the shelter in the enclosure housing the black buck antelope has only partial wall panels on the south and front sides of the shelter structure. The partial walls cannot thoroughly block the wind from blowing through the shelter. Modify the existing shelter structures or otherwise furnish shelters that provide more complete protection from winter weather conditions. Correct by 28 November 2014.

Inspection conducted with facility representatives. Exit briefing conducted on-site with facility representatives and the licensee via phone.

End of report.
