Type: ROUTINE INSPECTION  
Date: 11-SEP-2015

### 3.87(a)(10)

#### PRIMARY ENCLOSURES USED TO TRANSPORT NONHUMAN PRIMATES.

Construction of primary enclosures

\*\*\* On September 8, 2014, eight (8) non-human primates were shipped in primary transport enclosures constructed in a manner that waste products were able to leak from the enclosure while in transit. Primary transport enclosures should be leak-proof to prevent urine and feces from seeping outside of the enclosure and to prevent the animals from being excessively soiled. Transport enclosures that prevent the leakage of bodily fluids must be used for all future animal transport to keep the animals as clean and dry as possible while in transit. Correction: The IACUC conducted a review. The registrant has purchased and redesign d transport cages to meet the primary enclosure standards outlined in section 3.87 (a)(10). This item has been corrected.

### 3.87(d)(1)

#### PRIMARY ENCLOSURES USED TO TRANSPORT NONHUMAN PRIMATES.

Compatibility

\*\*\*On September 8, 2014, two (2) non-human primates were shipped in a double compartment transport enclosure with no divider. The animals arrived with minor wounds and blood was present in the transport enclosure. There was no paperwork indicating the breeding or pairing status of these animals.

Only one non-human primate should be shipped in a single transport enclosure to prevent possible fighting or injury to the animals while in transit. Measures must be taken to ensure that only one non-human primate is present per transport enclosure, except under certain provisions, for the overall health and safety of the animal. Correction: The IACUC conducted a review. New double compartment enclosures have been purchased and new transportation policies have been put in place. This item has been corrected.

The exit briefing was conducted with the facility representatives.

This is an electronic version of the inspection report dated 11 September 2015. This inspection report is amended to add the following header for both NCIs: "PRIMARY ENCLOSURES USED TO TRANSPORT NONHUMAN PRIMATES"
