Certificate: **52-C-0267**

Site: 001

Hunt Club of Virginia Beach Inc

Type: ROUTINE INSPECTION

Date: 24-JUL-2025

2.131(c)(1) Critical

Handling of animals.

According to records, ten (10) parakeets (*Melopsittacus undulatus*) have died between February and May of 2025 in the walk-through aviary. The facility maintains a population of about 500 parakeets and the public can enter a walk through section and feed the birds from a stick. According to death records, approximately 10 parakeets have died by being accidentally stepped on, kicked or caught in the door of the aviary. Small birds such as parakeets that interact with the public are at risk of injury. During public exhibition any animal must be handled and supervised so there is minimal risk of harm to the animal to assure the safety and wellbeing of the animals. Correct by end of business July 25, 2025.

3.153(a)(1)(ii) Critical

Primary enclosures.

According to records, five (5) parakeets (*Melopsittacus undulatus*) were found dead inside their primary enclosure with signs of trauma consistent with predation between February and May 2025. An additional parakeet was found deceased and stuck in a toy within the enclosure. Primary enclosures that allow predators to access the animals can lead to unnecessary trauma, injury, or death. Toys and extra enrichment within the enclosure must be carefully monitored to prevent injury to the animals inside. Correct by ensuring all primary enclosures protect the birds from injury. Correct by end of business July 25, 2025.

This inspection and exit interview were conducted with facility representatives.
