PREDATORS OF THE HEART

Type: ROUTINE INSPECTION
Date: 06-MAY-2015

3.125(d)

FACILITIES, GENERAL.

There is an accumulation of trash that consists of old food packaging from chicken and other trash debris located inside of a trash burn pit. The burn pit does not have a lid to cover the trash to prevent vermin infestation. During the inspection, the inspector saw an excessive amount of flies swarming around and inside of the trash burn pit. The trash burn pit is located 20 to 30 feet from the animal enclosures. Improper waste disposal can attract pests, cause odors and diseases. The licensee should ensure proper waste disposal of trash and food products so as to minimize vermin infestation, odors, and disease hazards.

3.131(d)

SANITATION.

There is an accumulation of trash that consists of old food packaging from chicken and other trash debris located inside of a trash burn pit. The burn pit does not have a lid to cover the trash to prevent pest infestation. During the inspection, the inspector saw an excessive amount of flies swarming around and inside the trash burn pit. The trash burn pit is located within 20 to 30 feet from the animal enclosures. Flies harbor diseases and could cause potential contamination in animal areas. The applicant should ensure an effective pest control program is in place to control pests and reduce potential contamination.

Correct by: May 20, 2015

Inspection and exit interview conducted by APHIS personnel with facility representative.
