3.127(d)

Repeat

Facilities, outdoor.

3 red kangaroos are contained in a large enclosure with 8-foot-tall chain link fence. The perimeter fence around the kangaroo enclosure is made of wire farm fencing and is approximately 4.5 feet tall. A perimeter fence must be strong and tall enough to prevent entry of unauthorized people and animals, and to act as a secondary containment system in the event that an animal escapes from its primary enclosure. Correct by maintaining a perimeter fence around the kangaroo enclosure that is at least 6 feet tall and 3 feet away from the animals primary enclosure, or by obtaining a variance from USDA. A perimeter fence must also be maintained around any existing or new exotic animal enclosures in accordance with the Animal Welfare Act regulations.

This inspection and exit interview were conducted with the owner.
