2.50(a)(1)

TIME AND METHOD OF IDENTIFICATION.

* The 42 puppies on premises do not have cage cards or identification. This does not allow with certainty the identity of the puppies and does not facilitate proper record keeping practices.

Identification is required for all adult dogs and puppies in order to ensure that each animal's identity can be known with certainty and to facilitate record keeping requirements.

To be corrected by, 28-February-2016.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

* Three enclosures inside the whelping barn are housing six adult dogs. These enclosures had a buildup of brown grime and dirt on the back wall. The grime and dirt indicate daily spot-cleaning is not taking place. Improper cleaning and sanitization can increase the accumulation of waste on the hard surfaces, and increase the disease potential for the dogs.

All hard surfaces must be spot-cleaned daily. Daily spot-cleaning and required sanitization will prevent an accumulation of waste and decrease the disease hazards for the dogs.

To be corrected by, 03-March-2016.

This inspection and exit interview was conducted with the facility representative and Randall Wagner (ACI).

This inspection report will be sent by email.
