PYMATUNING DEER PARK

Type: ROUTINE INSPECTION

Date: 18-JUL-2024

3.27

Facilities, outdoor.

The guinea pigs are currently being housed in an outdoor facility without prior approval from APHIS Animal Care. The guinea pig enclosure is surrounded by a building with walls and a roof, however, it is considered outdoor housing since it does not have a continuous connection between the walls and the floor, has large open windows without coverings, and is unable to control temperature and humidity.

Guinea pigs must be housed in indoor housing facilities, unless approved by Animal Care, to ensure that they are in an environment with an appropriate temperature and proper ventilation to provide for their health and comfort.

Guinea pigs shall not be housed in outdoor facilities unless such facilities are located in an appropriate climate and prior approval for such outdoor housing is obtained from the Deputy Administrator.

Correct by: September 1, 2024.

3.127(d)

Facilities, outdoor.

The perimeter fence is less than 3 feet in distance from the primary enclosure for the African crested porcupines. The perimeter fence is only 10 inches from the enclosure fencing.

It's important to maintain at least 3 feet between the enclosure and the perimeter fence to ensure that the regulated animals are protected from unauthorized persons and animals which may intend to have contact with them from outside the fence.

The perimeter fence must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosures and animals or persons outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved in writing by the Administrator.

Correct by: November 18, 2024.

3.154

Environment enhancement to promote psychological well-being.

The facility does not have a written program for environment enhancement for their birds. The facility has been providing the birds with regular enrichment opportunities, however, a documented program hasn't been developed.

A written plan for environment enrichment is necessary to ensure the psychological well-being and overall health of the birds.

Inspection Report

Exhibitors must develop, document, and follow a species- appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must address social grouping, environmental enrichment, special considerations, restraint devices, and exemptions.

Correct by: August 2, 2024.

This inspection and exit interview were conducted with facility representatives.
