JONAS AND ROSINA GRABER

Type: ROUTINE INSPECTION
Date: 06-DEC-2016

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

There is an excessive buildup of feces in 9 of the outdoor runs, as well as on the floor inside 7 of the primary enclosures. While the licensee is sanitizing once per week, there has not been consistent daily pick-up of the primary enclosures or runs. The fecal pick-up has been on every other day, or on this date it has been 2 days before cleaning. This lack of daily cleaning has caused the feces to cover all of the flooring inside and out and on the fencing where the dogs jump, as well as a considerable amount of feces on the dogs feet and legs.

The lack of daily pick-up and buildup of feces in the enclosures and runs can be a source of disease and possible health issues for the regulated animals.

The licensee must spot clean daily, or as often as necessary to prevent the buildup of dirt, grime and feces that comes in contact with the regulated animals.

To be corrected by: December 7, 2016

The licensee did spray down and clean the kennels by the end of the inspection.

Inspection and exit interview conducted with licensee.
