Type: ROUTINE INSPECTION
Date: 19-SEP-2022

2.40(b)(2) Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

One water buffalo had overgrown hooves on both front feet and the right rear foot. On the affected hooves, the inner hoof was curling into the other hoof.

Each exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, and treat diseases and injuries.

Hooves need to be trimmed as often necessary to prevent overgrowth that can lead to pain, injury and/or gait abnormality.

2.131(c)(1) Critical Repeat

Handling of animals.

The Michigan Department of Agriculture and Rural Development reported a bite incident to the inspector on August 8, 2022. A pot-bellied pig at the facility bit a child on July 29, 2022. There was no public barrier, and the attendant available was not able to prevent the child from being bit.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

Inspection Report

If an attendant is not effective in preventing an animal from biting a member of the public, there must be sufficient distance and/or barriers to assure the safety of the animals and the public.

3.75(a)

Housing facilities, general.

An outdoor enclosure, housing 4 ring-tailed lemurs, was composed of woven wire with 4in x 2in holes. One lemur was observed sticking its entire head and neck through one of the holes.

Housing facilities for nonhuman primates must be designed and constructed so that they are structurally sound for the species of nonhuman primates housed in them. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

Appropriate housing for the nonhuman primate must be provided and maintained to prevent injury or death to the animals.

To be corrected by October 3, 2022

3.125(a)

Repeat

Facilities, general.

Two timber wolves are being housed outdoors. The enclosure fence is composed of woven wire with holes. Depending on where the wire was stretched, holes ranged in size from 4in x 2in to 6in x 6in. The wolves were observed sticking their entire heads through the holes in the fence.

The facility must be constructed of such material and of such strength as appropriate for the animals involved. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Appropriate housing for the species must be provided and maintained to prevent injury or death to the animals.

Inspection Report

Feeding.

There were two pieces of deer carcass inside the primary enclosure for the two fox. These pieces of deer carcass had a very strong odor of decaying meat, and numerous flies on and around the pieces.

The food shall be wholesome, palatable, and free from contamination to maintain all animals in good health.

Remove food items when they have strong odor and/or deteriorate and are no longer wholesome, palatable or free from contamination to ensure animals are healthy and being fed an appropriate diet.

Corrected at time of inspection.

This inspection and exit interview were conducted with licensees.
