

Inspection Report

Spring Valley Laboratories Inc
P.O. Box 242
Woodbine, MD 21797

Customer ID: 96

Certificate: 51-R-0051

Site: 001

SPRING VALLEY LABORATORIES, INC.

Type: ROUTINE INSPECTION

Date: 08-APR-2014

2.31(c)(7)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

*** Protocol 256: A procedure was performed on a species not specified in the approved animal use protocol. Any changes to a protocol must be reviewed and approved by the IACUC prior to conducting any activity associated with the change. An IACUC review of protocol changes is to ensure that animals do not experience unnecessary pain and distress and to verify that personnel are adequately trained to handle and conduct procedures on a particular species. The IACUC must amend the protocol to include goats as a species and/or implement appropriate procedures to ensure protocol changes are reviewed and approved by the IACUC for all protocol deviations involving the use of animals.

Correct by May 30, 2014.

NOTE: The goat did not experience any pain or distress as it was a terminal procedure performed under anesthesia.

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***Protocol 229: Rabbits on the study failed to receive a prescribed medical treatment for a day and a half. Treatment for a medical condition must be administered as indicated by the attending veterinarian. Personnel must be trained on the procedures for identifying animals on treatment according to facility standard operating procedures to ensure the veterinarian's prescribed treatment is administered in a timely manner. Correct by April 18, 2014

An exit briefing was conducted with the facility representatives.
