Type: **ROUTINE INSPECTION**
Date: **22-FEB-2018**

3.14

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE DOGS AND CATS.

A 9 wk old mini goldendoodle "Holly" shipped 22 February 2018, on waybill 00829566 on American Airlines from CMH through ORD to SAN, was shipped in an enclosure that was not correctly labeled. There was no "Live Animals" marking on the top of the enclosure, and no arrows or other markings to indicate the correct upright position of the primary enclosure on one or more sides, although there was one live animal sticker on the back of the enclosure. Unless the enclosure is permanently affixed to the conveyance, it should be clearly marked on top and on one or more sides with the words "LIVE ANIMALS", in letters at least 1 inch (2.5 cm.) high and with arrows or other markings to indicate the correct upright position of the primary enclosure to help ensure proper handling by transportation personnel.

Carriers and intermediate handles must not accept any dog or cat for transport without proper labels because improperly label crates used to ship live animals could result in mishandling by transport personnel, which could be injurious to the animals.

Correct for all future shipments.

3.16(c)

FOOD AND WATER REQUIREMENTS.

A 9 wk old mini goldendoodle "Holly" shipped 22 February 2018, on waybill 00829566 on American Airlines from CMH through ORD to SAN, was shipped in an enclosure without food and water dishes securely attached inside the primary enclosure and placed so that the receptacles can be filled from outside the enclosure without opening the door.

Carriers and intermediate handles must not accept any dog or cat for transport without having food and water receptacles attached inside the primary enclosure so that the receptacles can be filled from outside the enclosure without opening the door to prevent escape during transport, especially for a young animal.

Correct for all future shipments.
