Type: ROUTINE INSPECTION
Date: 19-SEP-2014

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A written Program of Veterinary Care (PVC) was not available at the time of inspection. The owner stated that he had not had the veterinarian out this year and has not had any health problems with the animals. A written program must be available at the facility to assure personnel have accurate instruction for the care of the animals. The veterinarian must update the PVC regularly to assure that the prescribed treatments are applicable to the facility and to make recommendations for animal health. Less than yearly visits are not considered regular. Correct By: 3 October 2014

3.31(b)

SANITATION.

The facility was generally not clean as evidenced by cobwebs, dust and debris throughout. The cleaning employee had not been at the facility this week. Regular cleaning is needed to facilitate the husbandry of the animals and prevent the introduction of disease. Correct By: 23 September 2014

3.50(d)

FACILITIES, GENERAL.

The area under the rabbit enclosures on the south side of the building had an excessive accumulation of litter and feces. This accumulation was also quite wet which facilitated its extension into the aisle. Waste must be removed and properly disposed of to minimize infestation, odors and disease. Correct by: 23 September 2014

3.56(c)

SANITATION.

The facility was generally not clean as evidenced by cobwebs, dust and debris throughout. The cleaning employee had not been at the facility this week. Regular cleaning is needed to facilitate the husbandry of the animals and prevent the introduction of disease. Correct By: 23 September 2014

An exit briefing was conducted with the owner
