2.31(d)(1)(4)(1)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

An addendum to a protocol involving covered species specifies IM injections for sedation (ketamine/xylazine or Telazol); pre-emptive analgesia with carprofen. The Anesthesia Log for the procedure performed on one pig on January 09, 2016 utilized ketamine, then propofol for induction, followed by Isoflurane for anesthetic maintenance.

While a suitable anesthetic regimen was utilized, it was not that listed in the protocol approved by the Institutional Animal Care and Use Committee (IACUC) and failure to adhere to the approved protocol can result in pain or distress to the animals.

The Principal Investigator must either assure that the anesthetic regime listed in the approved, amended protocol is utilized or submit for approval to the IACUC a new protocol or amendment to this protocol which contains an anesthetic regimen created in consultation with the Attending Veterinarian (or other their designee veterinarian). The IACUC shall review activities involving animals in order to approve proposed activities and specifically shall determine that the proposed activities be performed with appropriate sedatives, analgesics or anesthetics, unless withholding such agents is justified for scientific reasons, in writing, by the principal investigator.

Correct by: The earlier of 1) any planned procedure or 2) April 30, 2016.

2.33(b)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

The header information of the anesthesia log, including the patient name, date of surgery, and personnel, was not completed for the procedure on a covered species conducted on January 09, 2016. The anesthesia log is a part of the animal's medical record and should be completely filled out. Personnel involved in the recordkeeping related to this procedure should be appropriately qualified and trained to maintain complete records.

Complete and accurate medical records are necessary to be consistent with the standards of adequate veterinary care.

A system should be in place to ensure medical records are kept current and up to date following a medical
