Type: ROUTINE INSPECTION
Date: 01-FEB-2018

2.50(c)(2)(iii)

TIME AND METHOD OF IDENTIFICATION.

The licensee did not have identification tags for any of the six dogs in her possession at the time of this inspection. All live dogs must be identified as required under this section. The licensee stated that the dogs are microchipped but a compatible microchip scanner was not available. Exhibitors must identify all dogs under their control using a method approved under the Animal Welfare Act via tag, tattoo or microchip. An approved method of identification must be obtained for all dogs. Correct by: March 7, 2018.

3.6(c)(1)(i)

PRIMARY ENCLOSURES.

"Hocus" a medium sized dog measured 28" from nose to base of tail. $(28+6)*34$ is 1,156 square inches or 8.03 feet of required space for primary enclosures. The wire crate used for sleeping and holding measured 38" x 24" providing 6.33 feet of space, which does not meet the minimum requirement. "Tarot" a medium sized dog measured 27 inches from nose to base of tail. $(27+6)*33$ is 1,089 square inches or 7.56 feet of required space. The wire crate measured "38 x 24" providing 6.33 feet of space, not meeting the minimum requirement.

The minimum requirements for space under the AWA ensures that the dogs are able to perform normal postural adjustments and have adequate freedom of movement when confined. These dogs were not actively being transported at the time of this inspection and were not in a mobile or traveling housing facility. Minimum space requirements must be met to provide for the comfort and well-being of the animals. Correct by: February 10, 2018.

3.6(c)(1)(iii)

PRIMARY ENCLOSURES.

The dogs "Hocus" and "Tarot" were housed in primary enclosures that only provided 3 inches of space between the heads of the dogs and the enclosure tops when the dogs were in normal standing positions. The minimum required space is 6 inches to allow adequate freedom of movement when confined. The dogs were not actively being transported and were not housed in a mobile or traveling facility at the time of this inspection. The required minimum head space of 6 inches must be provided. Correct by: February 10, 2018.
