Certificate: **35-C-0427**  
Site: 001  
Dawn Hofferber

Type: ROUTINE INSPECTION  
Date: 03-JUN-2025

---

### 3.125(a)

#### Facilities, general.

The licensee is not maintaining some areas in the outdoor housing facilities in good repair to protect the animals from injury and to contain the animals:

In the alpaca pasture, a piece of woven wire from where an old enclosure used to be located was stuck in the ground and sticking up in an area where the alpacas could step on it. Woven wire sticking up could cause injury to the alpacas. Ensure to remove this wire and maintain the alpaca pasture in good repair to protect the animals from injury.  
\*\*\*Correct by 6/9/2025.

In the bison enclosure, a loop of wire is loose at the base of the fence near the area where the licensee feeds grain. There is also a gap below the fence in that area. The loop of wire could cause injury to the bison, and the gap below the fence could allow the public to contact the bison, resulting in injury to the animal or public. Ensure to maintain the bison's fence in good repair to protect and contain him.  
\*\*\*Correct by 6/9/2025.

The inspectors observed a small goat kid going under the primary enclosure fence where there was a gap and then going back in with the herd later. The primary enclosure fence does not contain all of the animals. If goats are not contained within their enclosure, they could get injured. Ensure that the fence is maintained in a manner that safely contains and protects the goats, including the small goat kids.  
\*\*\*Correct by 6/17/2025.

### 3.158(d)

#### Cleaning, sanitization, housekeeping, and pest control.

Presence of wild rats observed during inspection indicates the licensee's program for control of mammalian pests is not effective. During the inspection, inspectors observed at least two rats going into the silver pheasant's enclosure and eating grain near the pheasant. Rats can carry and spread diseases that could harm the animals. Ensure that a safe and effective program to control rodent pests such as rats is established and maintained so as to promote the health and well-being of the birds and reduce contamination by pests in animal areas.  
\*\*\*Correct by 6/20/2025.
