Type: ROUTINE INSPECTION
Date: 04-AUG-2017

2.1(a)(1)

REQUIREMENTS AND APPLICATION.

On August 4, 2017 the exhibitor was operating a for-profit petting zoo with multiple regulated and non-regulated species at the Santa Clara County Fair in San Jose, CA. The exhibitor is not currently licensed with the USDA.

The petting zoo featured goats, pigs, rabbits, ducks, and chickens housed in a communal primary enclosure. A second primary enclosure that was contiguous to the first housed a zebu, alpaca and a tortoise. The two enclosures shared a common area of fence.

A valid license is necessary to allow USDA officials to identify entities involved in exhibition activities, to approve sites housing and caring for regulated species, to inspect in order to verify compliance with the Animal Welfare Act and to assure the health and well-being of animals.

The Exhibitor must from this date forward cease exhibiting until such time they possess a valid license. The Exhibitor must apply for, complete all requirements for and obtain a valid license with the USDA prior to resuming exhibition of any regulated species.

2.126(c)

ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

Multiple regulated species such as rabbits, goats, pigs and and an alpaca were on exhibit on August 4, 2017 at the Santa Clara County Fair in San, Jose, CA for which an itinerary was not submitted to the USDA Animal Care Regional Office.

Provision of the required itineraries are necessary to allow USDA officials to inspect in order to verify compliance with the Animal Welfare Act and to assure the health and well-being of animals at such venues.

Any entity which intends to exhibit any regulated species at any location other than the entity's approved site and stay overnight must submit a written itinerary. Such itinerary shall be received by the AC Regional Director no fewer

than 2 days in advance of any travel and shall contain complete and accurate information concerning the whereabouts of any animal intended for exhibition at any location. The itinerary shall include the information required under this regulation, such as the exact address, dates, number of animals, and the name of the person exhibiting and transporting the animal.

Correct: From this date forward

3.55

WATERING.

Multiple water receptacles were provided for rabbits. These receptacles were communal amongst regulated and non-regulated species. However, none of these receptacles contained clean and potable water. The fluid contained in these receptacles varied between translucent greenish or brown to opaque brown-black. A water receptacle in the first enclosure was filled with bedding material.

Access to sufficient potable water is required to maintain the health and well-being of animals. Access to water is also critical for maintenance of body temperature and such need is increased on warm and sunny days like existed on the date of inspection.

A system of maintenance of the cleanliness of water receptacles and provision of adequate potable water is required to maintain the health and well-being of the animals.

Correct from this date forward.

3.58(a)

CLASSIFICATION AND SEPARATION.

On the date of inspection, rabbits were housed with multiple species, including goats, chickens, and pigs.

Rabbits shall not be housed in the same primary enclosure with any other species of animals in order to prevent them from experiencing trauma, such as from being stepped upon by the goats, or other diseases.

Correct from this date forward

A system of maintenance of the cleanliness of water receptacles and provision of adequate potable water is required to maintain the health and well-being of the animals is required.

Correct from this date forward.

This inspection was conducted on August 4, 2017 with a representative who referred me to a posting containing the name and telephone of the owner. Observations and photographs were obtained from the area accessible to the general, non-paying public.

The exit briefing was delayed due to difficulties in contacting the owner and occurred on 06 September 2017.

This inspection report was hand delivered.
