Type: RE-LICENSE INSPECTION

Date: 17-OCT-2023

2.131(b)(1)

Handling of animals.

The halter on the zebu is not attached correctly and is hanging loosely around its neck. The current placement of the halter poses a potential safety hazard to the animal if it gets caught up on fencing, or another animal. This halter needs to be removed or attached securely to reduce this risk and for the safety of the animal.

3.125(a)

Repeat

Facilities, general.

**There are wire panels placed down on the ground in the cavy and crested porcupine enclosure that are not properly secured or buried. This is creating a potential hazard to the animals when they dig as holes are created which could cause them to potentially get a foot or leg caught in the panel. These sections of wire panel need to be covered to protect the animals from injury.

**There are metal screens in the windows of the crested porcupine and kangaroo enclosures that are in disrepair and need to be removed for the safety of the animals and to keep the enclosure in good repair.

3.127(d)

Facilities, outdoor.

The facility does not have a 6-foot perimeter fence around the property that can act as secondary containment for the crested porcupine, cavy and kangaroo species. The licensee does have a 5-foot fence that is around portions of the property and secondary entrances on all three enclosures to prevent escape when entering the enclosure for husbandry and cleaning procedures. There is no variance on record for the 5-foot fence. When fencing is less than 6 feet, a variance approved by the Administrator must be in place.

3.131(c)

Sanitation.

The shelter for the kangaroo is filled with miscellaneous tools, PVC tubes, a fan, signs, and other items that leave the area cluttered and do not promote good housekeeping of the area. Buildings housing animals must be kept clean and in good repair to facilitate the care of the animals. This shelter needs to be cleaned and clutter removed to reduce living areas for pests and to promote good housekeeping practices.

Inspection Report

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within (2) more inspection(s) or by Dec 17, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
