Type: ROUTINE INSPECTION
Date: 17-SEP-2021

2.1(b)(1)

Requirements and application

The capuchin monkey, Elvis, has been kept at the licensee's home since the pandemic shutdowns began. There was no notification to the Agency of the move. The home site is not covered under the license.

A license is issued to specific persons and for approved sites. The licensee must notify Animal Care at least 90 days prior to a substantial change in business, such as location of the animal.

Keeping Animal Care informed as to the location of the covered animal allows for the required unannounced inspections to ensure compliance with the Animal Welfare Act.

Correct by immediately notifying Animal Care of the new location of Elvis.

2.126(a)(2)

Access and inspection of records and property; submission of itineraries.

The current required records were not available for review at the time of inspection.

Access to records regarding the animals held and their care is part of the inspection process that allows the inspector to determine compliance with the care standards.

Correct by ensuring records are available for inspection from this point forward.

This inspection and exit interview were conducted with a facility representative.
