

## Inspection Report

Norristown Zoological Society  
1661 Harding Blvd  
Norristown, PA 19401

Customer ID: 2228

Certificate: 23-C-0006

Site: 001

NORRISTOWN ZOOLOGICAL PARK

Type: ROUTINE INSPECTION

Date: 22-DEC-2014

### 3.131(c)

#### SANITATION.

Section 3.131(c) Housekeeping: The following two items must be addressed.

1) The kitchen and quarantine rooms have the top layer of the floor peeling away in areas leaving indentations in the floor where dirt, food and debris can accumulate. Bacteria and mold may grow on food particles/residue on the kitchen floor and be tracked to animal areas on footwear or equipment. Disease agents and parasites may contaminate debris in the floor indentations in quarantine and be also tracked into other animal areas. The floor in the kitchen and quarantine must be repaired/resurfaced to be adequately cleaned to protect the health of the animals.

Correct by April 22, 2015.

2) Equipment and supplies are being stored against the inside of the 8 foot perimeter fence, especially in the front area by the parking lot. A function of the perimeter fence is to be a secondary containment system for the animals in the facility. The stored items against the fence act as stairs or steps so an escaped animal could easily reach the top of the fence to jump to the other side. The items stored along the perimeter fence must be moved so the perimeter fence may serve as a secondary containment system for the animals.

Correct by February 22, 2015.

An exit briefing was conducted with the general curator.
