Site: JFK

AMERICAN AIRLINES INC.

Type: ROUTINE INSPECTION

Date: 22-AUG-2023

3.15(e)(1)

Critical

Primary enclosures used to transport live dogs and cats.

A 9-week-old, male, German shepherd dog flew (flight AA 4279) into John F. Kennedy International (JFK) from Northern Kentucky International (CVG) on August 16, 2023 (AWB# 001CVG79929990). The dog's primary enclosure contained inadequate space. The dog's height exceeded the enclosure's height. Inadequate space during transport can cause stress, uncomfortable conditions, and prevents normal postural adjustments. Primary enclosures used to transport live dogs must be large enough to ensure each animal has enough space to turn about normally while standing, to stand and sit erect and to lie in a natural position.

This inspection and exit interview were conducted with airline representatives.
