Certificate: 31-A-0436  
Site: 001  
ANDY NISLEY

Type: ROUTINE INSPECTION  
Date: 19-JUN-2019

### 3.11(a)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

There were at least 2 enclosures with an excessive amount of feces on the outside portion of the enclosure. One enclosure had feces that was starting to turn white in color. In addition, about 75% of the wash downs had a mild to excessive accumulation of feces, food waste and mineral deposit build up. Not having a proper routine for cleaning and sanitation directly contributes to the odor within the facility and can attract unwanted pests and insects. Excreta and food waste must be removed from primary enclosures daily, and from under primary enclosures as often as necessary to prevent an excessive accumulation of feces and food waste, to prevent soiling of the dogs. In addition, all washdowns must be cleaned as often as necessary to prevent accumulation of feces and food waste and to reduce disease hazards pests, insects and odors.

Correct By 7/3/2019

### 3.11(b)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

On today's inspection, about 50% of the primary enclosures were not cleaned as often as necessary to prevent an accumulation of dirt, debris, food waste and excreta. Several of the enclosures had an moderate to excessive amount of black brown material adhered to the doggy doors. In addition, there were several enclosures that had an excessive amount of hair, food waste and other organic material built up on the wire mesh of the enclosure. Enclosure that have not been properly cleaned or have not been cleaned often enough expose the dogs to unnecessary disease hazards. All enclosures must be sanitized at least once every 2 weeks using one of the methods prescribed in paragraph (b)(3) of this section, and more often if necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards.

Correct By 7/3/2019

### 3.11(c)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

On today's inspection, there is overgrown grass weed and brush surrounding the two structures that contain dogs. There were areas where the overgrown grass, weeds and brush were growing directly under the washdowns of the primary enclosures. Overgrown grass weeds and brush can harbor unwanted pests and flying insects. Weeds,
