

Inspection Report

CITY OF MANKATO

P.O. Box 3368
Mankato, MN 56002

Customer ID: **545**

Certificate: **41-C-0283**

Site: 001

Sibley Park

Type: ROUTINE INSPECTION

Date: 07-JUN-2023

2.40(a)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A calf had hair loss and a scab that extended around the front half of its eye. The hair loss and scab had been observed prior to inspection, but the Attending Veterinarian had not been contacted prior to inspection. Hair loss and a scab indicates the calf may have some kind of infection. The infection may be contagious not only to other animals, but to the employees and the general public. In addition, the area around the eye may be irritating to the calf. The licensee must contact the Attending Veterinarian and initiate a treatment plan to treat the area surrounding the calf's eye. Correct by 6/13/23.

3.125(a)

Facilities, general.

Nail and screw heads were sticking out of boards on the goats' wooden playground/play structure. Nail and screw heads sticking out present a hazard as the goats could step on these and injure their hoof. All nail and screw heads sticking out either need to be removed, hammered or screwed in, or the structure needs to be replaced. Correct by 6/26/23.

This inspection and exit interview were conducted with the Facility Representative.

End of report.
