ABRAHAM BORNNTREGER

Type: ROUTINE INSPECTION

Date: 03-APR-2014

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Formal arrangements with a Veterinarian

No written program of Veterinary Care plan was available to be inspected at this time. Without an accurate and formal plan with a veterinarian, there is no way to prove that the animals are receiving proper treatment or care. An accurate and current veterinary care plan must be made available at the time on inspection.

Correct by 4/6/2014

2.40(b)(2)

REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries

One black dog which cannot be officially identified due to a lack of equipment, has excessively long and matted fur. Animals must be kept properly groomed to avoid injury or infection. Ensure that proper grooming practices are exercised throughout the facility.

2.75(a)(1)

REPEAT

RECORDS: DEALERS AND EXHIBITORS.

Records

Animal records were unavailable to be inspected. Complete and accurate record keeping is essential to properly track all animals. All records must be available for inspection at the time of inspection

3.1(e)

Inspection Report

There is a partially full bag of dog food in the facility that is open and not sealed to protect it from spoilage. Open bags of feed can attract insects or vermin, and can become contaminated. All open bags of feed must keep properly contained.

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Cleaning of primary enclosures

There is an overabundance of animal hair, extreta, cobwebs, and dust in, under, and around the primary enclosures. Improper sanitation practices can cause parasite or rodent accumulation, can cause illness in the animals, and can contaminate food and water. facility must be cleaned and maintained using the methods annotated in section 3.11
