### 3.1(c)(3)

#### HOUSING FACILITIES, GENERAL.

\* The outdoor enclosure, housing two adult dogs, had an accumulation of fecal waste on the concrete surface. The fecal waste was a gray to dark brown color. This indicates daily spot-cleaning is not taking place. Without daily spot-cleaning the accumulation of waste can attract pests, vermin and increase the disease hazards for the dogs.

All surfaces must be spot-cleaned daily and sanitized often enough for the prevention of an accumulation of waste and reduction of disease hazards.

To be corrected by, 06-July-2016.

This inspection and exit interview was conducted with the facility representative and Randall Wagner (ACI).

This inspection report will be sent both regular and certified mail.
