Site: 001

HILLTOP LAB ANIMALS INC

Type: ROUTINE INSPECTION

Date: 18-OCT-2021

3.31(a)(1)

Sanitation.

The primary enclosures for the guinea pigs housed in building 13 are not being sanitized at least once every two weeks.

The husbandry manager stated that the enclosures are cleaned weekly, however, sanitization is only performed every five weeks. During the inspection, the guinea pigs appeared healthy and the enclosures did not have an accumulation of excreta or debris.

Failure to sanitize primary enclosures at least once every two weeks can allow for an increase in disease hazards in the environment and negatively impact the health and well-being of the animals.

Primary enclosures shall be sanitized at least once every two weeks in a manner prescribed in the regulations.

Correct by November 1, 2021.

This inspection and exit interview were conducted with facility representatives.
