DAVID YOUNG, D.V.M., PH.D.

Type: ROUTINE INSPECTION

Date: 17-FEB-2016

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Bird feces were observed on four dog feeder lids and enclosure doors in an outdoor housing area. A staff member stated that birds are able to enter a space between a solid roof and the chain link fencing covering the enclosures where the birds attempt to roost.

Bird feces may contain pathogens that could adversely impact animal health. The facility should establish an effective program to minimize animal exposure to pests.

Correct by March 4, 2016.

An exit briefing was conducted with a facility representative.
