SANITATION.

The walls and floor of the enclosure housing the short tailed fruit bats is clean at time of the inspection ,however there are areas of black debris on the screen door at the entrance into the bat enclosure.. There is black debris present on the door sill in the service area of the exhibit. A buildup of debris may increase the hazard of diseases or odors. These areas need to be cleaned more frequently to maintain husbandry and a healthy environment for the animals .

CORRECT BY : 9-19-15

This focused inspection was conducted with a zoo employee. The exit briefing was conducted with the employee and by phone with the associate zoo veterinarian.
