Type: ROUTINE INSPECTION

Date: 25-JUN-2024

3.150(a) Critical

Facilities, general.

On May 25th, 2024, an oriole escaped from its enclosure. An employee entered the enclosure and the bird was able to escape while the door was opened. The facility was unable to capture the bird. An escaped bird could easily become prey to native predators. In addition, it could become injured and potentially die. Housing facilities must employ security measures that contain all birds securely. Correct by 6/26/24.

Note: Corrective measures were put in place after the bird escaped to prevent this from happening again.

This inspection and exit interview were conducted with the licensee.

End of report.
