3.11(b)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The dog room is too dirty. Five dogs have free access to the basement room. The room has a concrete floor and cinderblock walls. Dried mud, dirt, and hair is accumulated across the floors and walls, especially along the seams where the floor meets the walls and in corners. A couch, chair and ottoman in the room provide bedding which are heavily soiled. A drain from the adjoining utility room seeps water which the dogs cannot avoid when coming in and out. Accumulated dirt and moisture may harbor disease agents which pose a health risk to the dogs. Primary enclosures must be cleaned and sanitized as often as necessary to prevent accumulations of dirt, debris, waste, and other disease hazards. Surfaces which cannot be effectively cleaned and sanitized shall be removed or replaced when worn or soiled.

Correct by: November 23, 2015

Exit interview conducted with the Executive Director.
