Sanitation.

***The sugar gliders have accumulations of waste material and excreta on the floors and pans of the enclosures. While downsizing there are numerous pans an empty cages remaining in the room that have not been cleaned and sanitized and still contain waste material. The floor in the room has spilled bedding and waste indicating it has not been cleaned recently. Accumulations of waste material and excreta increases the risk of allowing the sugar gliders to become contaminated. Unclean cages increases odors which will attract insects and other pests increasing the risk of disease hazard. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.
