Type: ROUTINE INSPECTION
Date: 07-DEC-2023

3.9(b)

Feeding

There is a self feeding food receptacle in one outdoor enclosure, affecting 1 adult dog and 1 puppy, that has bird excreta in the food. The self feeder did not have a lid that could protect the food from bird excreta. The licensee must provide a lid to the self feeder or move it to a location that would protect the feed from being contaminated. The licensee must ensure that all food receptacles are constructed or located to minimize contamination by excreta, pests and protected from rain and snow.

To be corrected by: 10 Dec 23

This inspection and exit interview were conducted with licensee.
