Type: ROUTINE INSPECTION
Date: 18-JUL-2014

3.127(a)

FACILITIES, OUTDOOR.

When sunlight is likely to cause overheating or discomfort of the animals, sufficient shade by natural or artificial means shall be provided to allow all animals kept outdoors to protect themselves from direct sunlight.

All three camels were fully saddled with blankets and foam pad at time of inspection. One camel was performing rides while the other two were inside a portable corral set up in the direct sun with no shade. The midday temperatures were 100 plus. These animals must be provided shade to comply with USDA regulations and to protect the welfare of these animals from extreme temperatures. All other venues these camels are exhibited at must have shade from the sun.

Correct by: Animals were moved at time of inspection to take advantage of natural shade.

Note: This inspection was conducted at the Jackson County Fair.
