Type: ROUTINE INSPECTION
Date: 27-MAR-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***The older female miniature pincher has severe dermatitis. There are large patches of flaking skin and several areas of reddened, moist, raw skin. This dog shall be examined and treated by your veterinarian. Records disclosing condition and treatment should be maintained. Correct by April 1, 2014.

***The male bichon "Gibbs", the male and female Yorkshire terriers Emmy Lou and Woody, and the female miniature pincher were observed with extremely long nails. The toes of these dogs were turning to an abnormal position when the dogs walked. There were other dogs observed with excessively long toenails as well. Excessive length of the toenails can result in injury and joint problems. The dogs nails shall be properly trimmed to prevent injury and joint problems. Correct by May 1, 2014.

***The male bichon "Gibbs" is very matted around his hind legs, back and tail areas. Matting hair can lead to skin irritation. This dog shall be groomed to prevent skin irritation and provide for his comfort and well-being. Correct by April 10, 2014.

***The bichon "Gibbs, the miniature pincher and the male yorky "Woody" have a build up of a greenish grey hardened material on their teeth. These build-up cause dental problems such as inflamed gums, infection and loss of teeth. These dogs shall be examined and provided dental cleaning. Correct by April 27, 2014.

2.50(a)(1)

TIME AND METHOD OF IDENTIFICATION.

***The facility is currently using microchips to identify the adult dogs, the male dogs are not getting microchipped and there is no other form of identification other than their name being used. All dogs shall be properly identified (ie. collar and tags, tattoos, etc) as specified in Sections 2.50 and 2.51 of the Regulations. Correct by April 10, 2014.

2.75(a)(2)

Inspection Report

RECORDS: DEALERS AND EXHIBITORS.

***There is no written inventory. Records fully disclosing information concerning each dog purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer must be developed and maintained. The records shall include any offspring born of any animal while in your possession. Form 7005 - Record of Acquisition and Form 7006 - Record of Disposition shall be used to document this information unless a variance is requested and granted. Correct by April 10, 2014.

***Ten dogs were recently sold (within the past month). There are no records disclosing the transaction. Form 7006 - Record of Disposition shall be developed and maintained disclosing the information as required by paragraph (a)(1) of this section. Correct from today forward.

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

***The primary enclosures for the dogs are constructed of plywood with some of the walls covered with a plastic panel. The floors in the enclosures are plywood and some of the enclosures have carpeting on top. There is a strong odor of ammonia upon entering the kennel. There is an excessive build-up of excreta and waste material that has accumulated in the corners and along the seams where the walls meet the floor. In addition there is several days' accumulation of feces on the floors in the enclosures. Accumulations of feces and waste create unsanitary conditions which allow the spread of parasites and disease hazards. The solid waste and excreta shall be removed from primary enclosures daily to prevent soiling the dogs and to reduce disease hazards, insects, pests and odors. Correct by April 10, 2014.

Forms 7005 and 7006 were provided during this inspection.

The inspection and exit briefing conducted with the owner.
