Records: Dealers and exhibitors.

The animal inventory record did not include the barred owl. In addition, the facility verbally provided acquisition information for the owl but there were no written acquisition records available during the inspection as required. Failure to maintain these records can make it difficult to track animals being used in regulated activities to ensure their humane care and use.

The facility must maintain records containing the required information for animals which fully and correctly disclose the number of animals held, owned, and acquired or disposed of including births and deaths.

Environment enhancement to promote psychological well-being.

The facility provides enrichment for the barred owl but a written environmental enhancement plan for birds that documents the appropriate provisions to provide enrichment and special considerations and is approved by the attending veterinarian has not been developed by the facility.

Failure to document an environmental enhancement plan can result in birds not receiving adequate enrichment which can lead to behavior, social, health, and other psychological problems.

Facilities must develop, document, and follow an environment enhancement plan to promote the psychological well-being of the birds.
