

## Inspection Report

W Scott Turner  
695 130th Street  
Roberts, WI 54023

Customer ID: **7688**  
Certificate: **35-C-0188**  
Site: 001  
W SCOTT TURNER

Type: ROUTINE INSPECTION  
Date: 24-AUG-2016

### 3.84(a)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

There is an accumulation of excreta on and pushed into the grooves of the resting perch located in the Capuchin enclosure. The excreta is attracting flies. The presence of the excreta creates odors, soils the animals, attracts flies and can contribute to the spread of disease. Clean primary enclosures daily and as often as necessary to prevent the accumulation of excreta on all surfaces in contact with the monkeys. Correct by September 2, 2016.

### 3.125(d)

#### FACILITIES, GENERAL.

There is a gutter cleaning system in place to assist in the elimination of water used in the cleaning of enclosures, food and animal waste and soiled bedding from the animal facility. However, at the time of inspection there is standing water in approximately half of the gutter. The water is dark in color, dirty with animal waste and discarded food and has a foul smelling odor. The standing water also is contributing to the attraction of flies. Failure to provide adequate and frequent waste disposal that eliminates the standing water and soiled organic material increases the risk of odors, insects and disease hazards. Establish and maintain an effective waste disposal system in order to minimize insects, odors and disease hazards. Correct by September 2, 2016.

### 3.131(d)

#### SANITATION.

There is a large presence of flies and other small flying insects in the barn. Flies and other insects can contribute to the spread of disease and can irritate the animals and cause discomfort. Establish and maintain an effective method to control flies and other insects. Correct by September 2, 2016.

This inspection and exit interview were conducted with the licensee.
