Certificate: **73-A-1257**  
Site: 002  
Chris McGill

Type: ROUTINE INSPECTION  
Date: 19-AUG-2025

---

### 2.75(a)(1)

#### Records: Dealers and exhibitors.

A cage housing six puppies and the mother had no cage card for identification. A single housed puppy had no cage card or other means of identification. Each dealer shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog or cat purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control. The licensee must ensure that all puppies have an appropriate method of identification.

To be corrected by 8-25-2025.

### 3.11(a)

#### Cleaning, sanitization, housekeeping, and pest control.

The washdowns under the kennel enclosures had an excessive accumulation of discarded feed, fecal material, and standing contaminated water. The buildup of organic materials could attract pests and may increase the risk of disease. Excreta and food waste must be removed from primary enclosures daily, and from under primary enclosures as often as necessary to prevent an excessive accumulation of feces and food waste, to prevent soiling of the dogs or cats contained in the primary enclosures, and to reduce disease hazards, insects, pests and odors. The pans under primary enclosures with grill-type floors and the ground areas under raised runs with mesh or slatted floors must be cleaned as often as necessary to prevent accumulation of feces and food waste and to reduce disease hazards pests, insects, and odors. The licensee must clean these washdowns and ensure they are cleaned as often as necessary to protect the welfare of the animals.

To be corrected by 8-25-2025.

This inspection and exit interview were conducted with the licensee.
